WINDOW SILLS

WINDOW SILLS

DATA SHEET

Our window sills are durable, corrosion-resistant components designed to provide a protective and aesthetic finishing touch to window installations. Offering excellent weather resistance, structural support, attractive appearance, making them suitable for various residential, commercial, and industrial applications.

Key Features:

Material: High-grade aluminium

Finish Options: Powder Coated standard range of RAL Colours

Profiles: Available in flat, sloped, or custom profiles

Length Options: Customisable up to 4 meters

Thickness Options: 1.5mm to 3mm

Welded stop ends and upstands

Environmental Resistance: Corrosion-resistant, UV-stable, and weatherproof

Technical Specifications:

Material Composition: Aluminium alloy 1050A

Standard Lengths: Customisable lengths up to 4m

Profile Types

Sloped: Various widths with a standard 5-degree slope

Custom: Tailored to specific architectural requirements

Finish Types:

Powder-Coated: RAL colours available

Performance Characteristics

Durability: High resistance to corrosion, suitable for coastal and industrial environments

Maintenance: Low maintenance, easy to clean

Installation: Pre-drilled fixing holes available on request, easy to install with standard tools

Compatibility: Suitable for use with various window systems, including aluminium, Aluclad, UPVC and timber.

Applications

Residential buildings: Houses and apartments.

Commercial buildings: Offices, retail stores, and hospitality establishments

Industrial buildings: Warehouses, factories, and workshops

Public buildings: Schools, hospitals, and gov facilities

Customisation Options

Dimensions: Custom widths, lengths, and profiles to match specific project requirements

Colours: Wide range of RAL colours to match building aesthetics

Accessories: Welded end caps and upstands, welded corner pieces.

Installation Guidelines:

1. Measure and cut the aluminium window sill to the required length.
2. Pre-drill fixing holes if not pre-drilled.
3. Apply a weather-resistant sealant to the back edge of the sill.
4. Position the sill under the window frame and secure it with screws through the pre-drilled holes.
5. Seal all joints and edges with appropriate sealant to ensure a watertight installation.

Maintenance Instructions

Clean with mild soapy water using a soft cloth

Avoid abrasive cleaners/tools that may harm surface

Inspect periodically for any signs of blockage, damage, or wear and clear debris as necessary.
