OLSO

ELEGANT

At Alupress, we design and manufacture premium aluminium planters tailored for corporate, architectural, and high-end commercial spaces. Proudly made in Ireland, each unit is fabricated and powder-coated in-house at our Dublin facility.

Our planters are fully customisable, available in any RAL colour, with options for fibre laser-cut logos, custom lettering, and multiple size configurations. Ideal for reception areas, office entrances, forecourts, terraces, and showrooms, they combine durability with a clean, modern aesthetic.

Designed for architects, designers, and corporate clients, these planters offer a sophisticated alternative to concrete or fibreglass. Lightweight, weather-resistant, and built to last, they suit both indoor and outdoor environments.

We work closely with every client to deliver sharp lead times and competitive pricing. Whether you're branding an entrance or upgrading a luxury space, our aluminium planters offer a striking, architectural solution, made to order, made to last.

STOCKHOLM

Our aluminium planters are the perfect addition to dealership showrooms, reception areas, and corporate environments. Designed to complement clean architectural lines, they add structure, colour, and elegance to any space without distracting from the main focus. Available in any RAL colour and size, they're fully manufactured in-house for consistent quality and quick lead times. Whether used to frame walkways, add definition to waiting areas, or elevate entrance lobbies, these planters create a smart, welcoming atmosphere. Durable, weatherproof, and maintenance-free, they are as practical as they are stylish, trusted by premium brands across Ireland and the UK.

Each planter is built from architectural-grade aluminium and powder coated for a flawless, long-lasting finish. They're ideal for both indoor and outdoor use, with optional extras such as laser-cut branding, matching feet, and custom plant selections. As dealerships and corporate spaces continue to focus on presentation and experience, our planters offer a simple, effective way to create impact. Their sharp lines, subtle presence, and low-maintenance appeal make them a favourite among architects and design professionals. Whether it's a luxury car showroom or a high-end reception, our planters deliver immediate visual value.

UNIQUE

We can personalise our aluminium planters with your company logo and custom lettering using precision fibre laser-cutting. Ideal for branding entrances, showrooms or commercial spaces, the logo is cut from 1mm aluminium and fixed cleanly to the planter for a sharp, modern look that's built to last indoors or out.

U R B A N

Our aluminium planters are the ideal addition to any urban development, especially when it comes to garden zones, shared outdoor spaces, or show home landscaping. Designed with clean, modern lines and available in any RAL colour, they complement the contemporary look of new builds while adding softness and greenery to harder, paved areas.

Unlike timber or plastic alternatives, our planters are made from fully welded, powder-coated aluminium, meaning they won't warp, rot or crack over time. They're weather-resistant, maintenance-free, and built to last for decades in Irish conditions. Whether placed along entrances, patios, rooftops or footpaths, they deliver instant impact with very little upkeep.

From tidy border planting to stylish focal points, these planters make it easy to define zones and add life to new outdoor environments. They're a simple, long-lasting way to elevate kerb appeal, improve biodiversity, and create inviting spaces for residents to enjoy, all without the maintenance headaches.
